KINOMAP CONNECTION TROUBLESHOOTING

If having difficulty connecting your Johnny G Spirit Bike to the Kinomap app, follow the steps below to clear and establish a Bluetooth connection.

- If Bluetooth not connecting, check to see if the bike BT is connected to another device (tablet or phone, watch, etc.). Use option to Forget This Device to end a connection.
- Turn off then turn on BT switch in the settings menu of IOS or Android device.
- Reset the bike console (press and hold the PLAY and + keys simultaneously for 3 seconds), bike displays CONSOLE RESET.
- When the console resets, all the connections are reset...just like when you restart your computer.
- If bike does not automatically pair, check connection in Equipment Management to see if mph, rpm, watts and bpm are being displayed and then save.
